

## Sign System for Emergency Scenes

### Fold & Roll® Sign System

The Fold & Roll® sign and stand combination brings ultra compact system storage and lightning fast deployment to emergency traffic control.

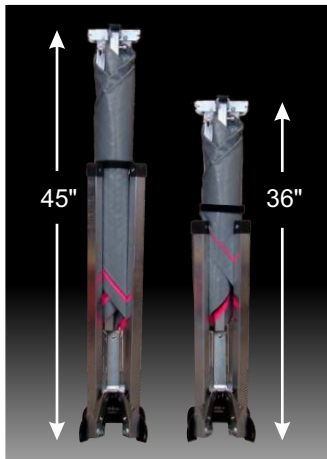

Designed so that a full 48" sign and stand combo fits easily into the trunk of a squad car or a small storage compartment on a truck, the Fold & Roll® sets up far faster than any other sign system in the industry allowing responders to concentrate fully on the task at hand.

Sign faces are made of fluorescent pink reflective material recommended by the FHWA and the National Fire Protection Association (NFPA 1500) for use at emergency scenes.

*From stored  
to deployed in  
20 seconds!*

Complete 48" and 36" Sign Systems  
Storage Configuration

- NCHRP-350 approved and MUTCD compliant, the 48" system is MASH approved.
- Sign panel detaches from stand for changeability of legends via the Stablock panel holder.
- Stand features the Stablock™ sign holder, telescoping legs with kick releases, and torsion spring system which reacts smoothly to gusty wind conditions.
- All systems include a double flagholder and two 18" vinyl flags.

Signs become more versatile with the addition of velcro and overlays.  
Many messages and sizes available on request.
