EXCLUSIVE VIBRAM® OUTSOLE

WHEN YOU SEE THE 

YOU KNOW IT REPRESENTS LION'S QUALITY AND PATENTED **V-FORCE®** COMFORT, MOBILITY AND SAFETY.

V-Force® USA

Structural Fire Boots

LION V-Force® revolutionized the turnout industry by delivering the optimal balance of comfort, mobility, and protection in gear that moves with your body. Building on those same design principles, LION is extending the benefits of V-Force with the new LION by Thorogood V-Force USA structural fire boot.

The V-Force USA boot offers advanced mobility and all-day comfort thanks to lighter-weight materials, including a mix of leather and Armor AP™ along with a proprietary ultra-lightweight Vibram® outsole. Anatomically engineered flex gussets and an enhanced insole deliver superb flexibility and foot stress relief, with superior shock absorption.

Each boot is assembled in the USA using globally sourced materials by LION and our expert footwear partner, Thorogood. Engineered with a GORE-TEX PFAS-Free* CROSSTECH footwear laminate, the boots provide breathable, durable, and liquid-resistant protection.

*Made without intentionally added per- and polyfluorinated substances; may contain trace amounts.
